

## CITY PROJECTS

Clear road hazards for bicycle riders.

Buy local first.

Green computer servers.

Adopt the Kyoto Protocol.

Create sub-utility districts

Create renewable energy generators

Send a letter to the city residents explaining LNG

Work with local grocery stores to sell more locally grown products.

Create more mass transit systems that connect with the other communities in Ventura County

Set traffic signals for better traffic flow and reduce idle vehicles

Create more bike lanes

Require deposit on plastic soda bottles, beer cans, etc.

Ban Styrofoam from restaurants

Subsidize clothes lines for the community

Track the progress for the city and residents

Reprint "Earth Day" posters

Make bus information more accessible

reduce mean temperatures downtown

create more "green" roofs

city run and owned power company

begin education programs on global warming and global cooling

## PERSONAL PROJECTS

Consider LCD rather than Plasma when you are ready to purchase a new large format TV.

Use power strips to manage your computer peripherals.

Consider smaller breed dogs that have a smaller carbon footprint.

Ride bike to work instead of getting into the car.

Reduce the use of consumable goods.

Plant trees that can produce shade to reduce air condition use.

Solar Panels

Bio-diesel car

Clothes lines instead of electric dryers

Drive smaller, more fuel efficient vehicles

Educate others about proper vehicle choices

Ask your local grocery stores to provide cloth bags

Use cloth bags when you do your shopping.

Support prop 87

Reduce or eliminate your consumption of meat and meat byproducts

[www.gaurdianangelcars.org](http://www.gaurdianangelcars.org)

Grow as much of your own food as you possibly can.

Grow edible landscaping

Contact your congressman regarding global warming and possible methods of correcting it

Use your dollars to send a message to the business community.

replace ballasts to reduce energy usage

Reconfigure your home and office environment to make better use of natural light

Recycle carbon dioxide

[www.uofjai.com](http://www.uofjai.com)

Dialog with your neighbors about global warming

Dialog with your kids about global warming

Get your local schools to dialog with the students about energy consumption and recycling

Give Al Gore's movie as a Christmas present

Use fans instead of central air and heat

Plan your trips to use the least amount of gas possible

Vote YES on prop 87 and 89

Be vocal against LNG

WALK where you can!

Vote green

be part of the mass movement

Let businesses know why you aren't buying their non-environmental products

Install solar water heaters

Turn out lights when they are not in use

buy organic

visualize a greener, cleaner environment

plant a green roof

unplug cell phone charger when not in use

support global cooling

use public transportation
